

2011 Le Jardin du Gourmet Seed Catalog
"Specializing in Sample Packets of Herb, Vegetable & Flower Seeds"
 Also Shallots , Garlic and Rocamboles

*The Secret of
French Cooking*

**Garlic
Softneck**

Plant Spring or Fall

This is the white soft neck variety. Great in all types of cooking. To plant split bulbs into cloves when you are ready to plant them. There are about 3 bulbs or 35 cloves in 8 oz of garlic. Plant the same as shallots.

8 oz net wt. \$9.00

**Rocamboles
Hardneck Garlic**

Fall Planting Only

Makes a bulb like garlic and has similar flavor. Plant same as shallots. You can start from seeds or bulbs. Bulbs are easier and faster if you want garlic the following season. You can increase bulb size if you cut or fold the top of the stalk where the seeds are produced before the seed matures.

8 oz net wt. \$12.50

Jerusalem Artichokes

Available in Late-September

Easy to grow and heavy producers. Stalks grow to 8ft. Great raw or cooked.

8 oz net wt. \$8.50

Leeks for Fall Planting

Shipped August / September Only

These are pencil size leek transplants and are offered in two varieties. Planting instructions.

Lge American Flag: 50 plants. . . \$9.50

Bleu de Solaize: 50 plants. . . . \$9.50

Ginseng

Fall Shipment Only

Packet of 20 stratified seeds with instructions

Packet of 20 Seeds. \$3.50

Shallots

For Planting and Cooking

For Spring or Fall Planting

These are the smaller bulbs for planting. There are approximately 8-12 bulbs in an 8 oz box of these shallots. They can be different varieties depending on the season. Plant bulbs about 6" apart in rows about 8" apart so you can hoe and weed easily. Weeding is important, shallots hate to compete with weeds. Plant the depth of the bulb with the bulb's top pointing up. In the winter you could plant the bulbs in a pot on the windowsill and cut the greens off for cooking or in salads.

8 oz net wt. \$8.75

Frogs' Legs Shallots

Fall Only

This is **The Shallot** that the restaurants love to buy, they can grow as big as chicken eggs. If you plant them you could have a lot of small bulbs when it's harvest time to replant for new year.

8 oz net wt. \$8.75

Grey Shallots

Fall Planting Only

Our customers who have been to France have requested these as the "TRUE SHALLOTS" They have a stronger flavor than the other shallots.

8 oz net wt. \$12.50

Shallots for Cooking

Shipped All Year

We have different varieties throughout the year and send the largest bulbs for cooking. Recipes included

8 oz net wt. \$8.50

Get Acquainted Offer

4 sample packets of herb seeds, 6 oz of shallots, 1 bulb of garlic and recipes. Makes a nice gift.

Only. \$8.25

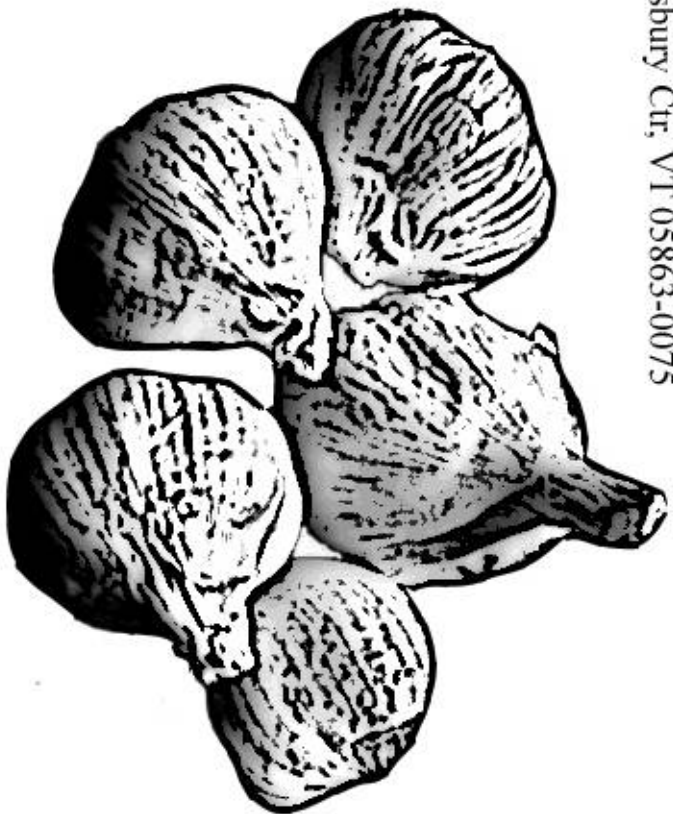

**Shipping & Handling included in price of
Shallots, Garlic and other bulbs on this page.

Specializing in 35 cent Sample Seed Packets

Greetings from the Green Mountains

This year was a busy one. We built a new and bigger building to move into. Thanks to all our customers our seed business has outgrown the place we are in.

You won't see a lot of changes in this years catalog however we will be adding new varieties of seeds to our online catalog so if you see it online you can circle that number on your order form and we'll send you the seed. Peppermint and Spearmint seed are still in short supply and we will ship those seeds as they become available to us. Jerusalem Artichokes should be available this fall as long as the deer can be kept away. Yes we fence, put fishing line around, use old mylar balloons, place hair and Irish Spring soap on the garden and they still feel the need to come in and have a taste You can order anytime online day or night on our secure website. We charge your credit card when we ship your order the website does not. We also have a printable catalog online. You can print the whole catalog or just the order form. (saves me printing and postage and you have it at soon as you print it). So whether you have a huge, small, patio or windowsill garden, you're a serious, novice or love to experiment type of gardener we have the right size seed packet for you! Help your budget, grow a garden!

From everyone here we hope you have a great gardening season!

Our web address is ArtisticGardens.com

Call and Order Toll Free at 1-800-659-1446

Shipping and Handling Charges

Seeds Only \$ 3.50

Plants to Zipcodes starting with 010-199 \$ 8.50

Plants to zipcodes starting with 200-999 \$12.50

During the winter (November-April) Seeds and Plants are shipped separately

All bulbs and books are postage paid unless marked otherwise.

Seed orders to Foreign Countries (sorry we can't ship plants or bulbs) \$ 8.50

Planting Instructions for Herb Seeds

For best results the seeds should be started inside in seed trays & then transplanted outside when weather permits.

To start seeds indoors you'll need the seed tray (one with small holes in the bottom for drainage), next you need to add a good germinating soil found in Garden Ctrs., or Hardware stores. Put soil in the seed tray and soak with a fine mist of water and then let it drain. Put your finger in the soil to make sure the soil is moist all the way through. Take a ruler and make thin lines across the soil for rows to plant the seeds in. Sprinkle your seeds evenly in the row and mark each row with what you planted. Cover with a thin layer of soil, water lightly and cover with clear plastic to keep moisture in. Place seed tray in a warm place 60-70 degrees F, when the seeds start to sprout put under a grow light. Remove the plastic but remember to check daily so plants don't dry out. Over watering is just as bad for seedlings as they will rot quickly at this stage if setting in soaking water too long. When the seedlings in your tray develop 2 or 3 true leaves it's time to transplant into pots or outdoors if it's time. If transplanting outdoors in the early spring make sure you take them outside for a couple of hours each day to harden them off to the cooler temperatures.

The hardest plants to start from seed are: Angelica, Chervil, all Lavenders, Rosemary, Sweet Cicely

In 1976 we started selling seed in sample packets. We buy the seeds in bulk from big seed companies all over the world so you are assured of the best quality seed, and then we package the seed in sample packets and large packets. Sample packets are great if you want to try a certain seed, like to grow a lot of different things or have a limited space to use for growing.

We only have two sizes of seed packets for the seeds listed below our Sample Packet and our Large packet. All Sample Packets are .35 cents and all Large Packets are \$ 1.00. To know how much seed is in a packet use the chart below. When looking at a certain seed you will see its item # then the name of the seed and a brief description of it and some uses, after that there will be two letters spaced far apart, the first letter tells you how much seed is in the sample packet the further letter tells you how much seed is in a large packet.

Packet Size Chart : A 3 - 5 seeds / B 10 - 25 seeds / C 30 - 50 seeds
 D 75 - 100 seeds / E .125 grams / F .250 grams / G .500 grams
 H .750 grams / I 1 gram / J 2 grams / K 3 grams
 O ½ ounce / L 1 ounce / M 2 ounces / N 3 ounces

#	Seed	Description	Packet Size	
			Sample	Large
1	Angelica	3-5' Perennial, Full-Part Sun. Slow to germinate. Culinary, Ornamental & Flavoring uses.	A	I

"See our website for more varieties of seeds www.artisticgardens.com"

Sweet Cicely Seed This year we will offer sweet cicely seed only in the fall as soon as the new seed is available for harvest. This is a tough seed to germinate and the fresher the seed the better your chance's are. Sweet Cicely has fern like leaves and white flowers, the plant grows to 3 ft and is hardy to zone 3. Plant likes partial shade and moist well drained soil. The plant can be used in salads, the root can be used like parsnips and the seeds are used in candies and syrups. It has a sweet licorice flavor

Myrrhis odorata - Umbelliferae **20 seeds in fall. . . . \$3.00 postage paid**

"Shiitake Mushroom Log"

Shiitake Mushroom Log The Shiitake (she-TAH-kee) mushroom log is an all natural product, organic ready to fruit hardwood log that has been inoculated with high quality shiitake spawn and incubated for 8-12 months. It will grow mushrooms every two months for about four years. A log usually produces about 1/4 to 1/3 pound of shiitakes at first and yields increasingly larger crops with each fruiting. Eventually, the log can be covered top-to-bottom with mushrooms. Harvests taper off in last year as the wood cells are consumed. The mushrooms are grown indoors in living areas and/or outside in shade. The log is preferable to a sawdust kit because of its continued production, disease resistance, and superior mushroom

It is unique even among natural grow-your-own shiitake logs currently on the market because it includes:

- * an attractive tray for soaking, resting and fruiting the log
 - * a shade cloth to control exposure to light
 - * a plastic bag to increase humidity during fruiting
 - * a recipe book
 - * clear, complete instructions
 - * our full refund and replacement guarantee from the grower
 - * shipped direct from grower
- Log is 3"-4" in diameter & 13"-14" long in an 18" plastic terra-cotta tray

Shiitake Mushroom Log **\$45.00 postage paid**

50 Sample Herb Packet Special

We have offered this special in card decks since the year 2000 and a lot of you have asked us to put it in our catalog. This is 50 packets of our most popular herb seeds (We have preselected the seeds) Just check the box on the order form for 50 seed packet special. What a great way to experiment with a variety of different herbs without spending a fortune! **\$17.50 ppp**

Fall Leek Transplants

Large American Flag and bleu de Solaize

We start them in late spring and grow until they are pencil size and ready for transplanting in the fall. Both varieties overwinter well in the ground. When you receive plant 4-6 inches apart in rows up to a foot apart. Plant 3 inches deep. If you start having freezing weather and little snow you will have to mulch over with straw. Remember leeks like rich soil with plenty of compost .

50 pencil size transplants either variety \$9.50 PPD

**PPD means Postage included in the price and all books are PPD
Order line 1-800-659-1446 / Order Online ArtisticGardens.com**

#	Seed	Vegetables Description	Packet Size	
			Sample	Large
Asparagus				
Pour warm water over seed and allow water to cool, repeat twice then plant 2 inches deep, ½" to 1" apart. Keep well weeded and transplant the following spring 4" deep & 18" apart in loose, light soil.				
201	Asperges D'Argenteuil	Light Green with white stalks	A	J
Beans				
Sow bush beans 1"-2" deep & 2"-3" apart. Start April-July in North & February-April or August-September in South. About 1lb per 100 ft row. Pole beans sow 1"-2" deep and 4"-6" apart. Start May-June in North and late spring in South.				
179	Feves	63 day, Plant very early in spring, large pod, broad flat bean.	A	L
180	Fin de Bagnols	Thin round bean, fast growing, Old Variety	B	O
181	Daisy Haricot	Called the Eat All Bean. Easy to pick, bush-type bean	B	O
182	Flageolet Vernel	#1 in French market, eaten fresh or dried, bush-type	B	O
183	Flageolet Rouge	Same as Flageolet Vernel but Red in color	B	O
189	Triomphe de Farcy	Back by popular demand!	B	O
190	Aiguille verte	45 day stringless extra-fine bush bean, white seed	B	O
197	Haricot Dolique	Yard long pole bean, 80 days, pods grow 3" long	B	O

112	Nantes Tip-Top	69 day, coreless, 6"-8" root, bright orange	D	K
157	Baby Carrots	55 day, 3½" root, golden orange, sweet flavor	B	I
158	Round Carrots	65 day, large round radish shape, sweet	B	I
206	Nantaise Gem Short	69 day, 6"-8" root, deep orange	D	K
207	Touchon Long	60 day, 7"-8" root, sweet in flavor, stores well	D	K
418	Blanche a Collet	White carrot, 40-50cm long, green foliage, stores well	D	K
Cauliflower				
Plant ½" deep, 14"-18" apart. Plant April-June in North & January-February in South.				
113	Snowball	80 day, vigorous & compact, large white head	C	J
288	Violet	65 day, beautiful purple heads add color to salad, green when cooked.	A	B

#	Seed	Description	Sample	
			Sample	Large
Celeriac				
Plant ¼' deep and 6"-8" apart. Looks like a large turnip rooted in celery. Has celery flavor, great in stews, boiled or sliced. Needs to be well fertilized and watered all season.				
114	Large Smooth Prague	115 day, Hollow stems not used	C	I
Chard				
Plant ½" deep, 8-12 seeds per foot and thin to 6" apart. Tender leaves used as green or the midrib may be cooked like asparagus.				
70	Giant Lucullus	55 day, light green curled leaf, thick cream stalk	C	K
104	Fordhook	60 day, medium green crinkled leaf, white veins	C	K
254	verte a charde blanche	Imported from France, green with white ribs	B	K
455	Rhubarb Chard	60 day, red stalks, dark green leaves	C	K
Collards				
Plant ½" deep 1" apart then thin to 8"-12" apart. Harvest lower leaves progressively up stem.				
115	Georgia	80 day, popular old variety, 2-2½" high. Blue-Green Leaf	B	I
Cucumber				
Plant 3-4 seeds 1" deep every 4'. To have cucumbers sooner start indoors about 4 weeks earlier than you could plant them outdoors in 3" pots, 3-4 seeds per pot. Transplant a week after last frost and be careful not to disturb roots when transplanting.				
116	Marketer	64 day, 8" long slicing cucumber	B	J
117	National Pickling	52 day, medium long, rich green, crisp	B	J
118	Burpless	55 day, bush type, high yielding, uniform fruit	A	B
222	Verte Petit de Paris	Cornichon (gherkin) 53 day, Imported from France	B	I
223	Fin de Meaux	Cornichon (gherkin) 53 day, great for pickling	B	I
415	Armenian	60 day, long, pale green, thin skin, no need to peel	B	J
419	Fanfare	63 day, semi-dwarf, 8-9" fruit, can be grown in pot	A	B
Cress				
To place just broadcast across area to be planted. Used in salads, sandwiches or as garnish.				
226	de Jardin	Garden Cress, Annual, 1' ht, grows in any garden soil	D	G
227	de Fontaine	Watercress, Annual, 1" ht, grows well near water	B	E
Ornamental and Dwarf Corn				
Plant 1" deep, 3 seeds per hole, 8"-12" apart. Plant when soil is above 65 degrees for best results. Plant May-June in North & February-April in South.				
174	Ornamental Indian	100 day, 5' tall with full size ears of mixed colors. Great for fall decorating.	B	O
175	Red Strawberry	Popcorn, 100 day, resembles strawberries, decorative	B	O
478	Blue Popcorn	108 day, 8"-9" ears, purple-blue, pops big & tender	B	O
479	Hopi Blue	110 day, open pollinated, sweet-corn flavor, dries blue	B	O
485	Carousel	100 day, mixed colors, 4" ears, decorative uses	B	O
"Dandelions, Endive and Radicchio"				
Plant ½" deep and 8"-12" apart. Start in April-June in North & February-April in South. For a more delicate flavor blanche endive by tying the outer leaves together. Escarole has thinner leaf than endive. Dandelions can be planted 6"-8" apart. The greens are delicious in salads and in cooking. The greens should be harvested when they are young, less than 10" tall. Radicchio has green leaves in the summer then as cold weather starts leaves turn red and form tight ball. Adds flavor and color to salads.				
Dandelions				
252	Verte de Montmagny	French Variety, overwinters very well	C	H
Endive and Escarole

“Books on Herbs and Gardening”

Rodale’s Illustrated Encyclopedia of Herbs

Edited by Claire Kowalchik & William H Hylton

How to grow herbs, how to design gardens with herbs, how to cook with herbs, how to use herbs medicinally & how to make dyes from herbs. It’s all here in this extensively researched A to Z encyclopedia containing more than 150 herbs.

Soft cover, 552 pages Color photos & illustrations **\$ 19.95 PPD**

Your Backyard Herb Garden

By Miranda Smith

There isn’t a beginning or seasoned gardener who doesn’t love the beauty & intoxicating smell of herbs. You’ll find easy to follow instructions for preparing an herb garden, choosing and starting seeds, growing and harvesting as well as recipes and innovative ideas for herbal crafts and gifts.

Paperback, 160 pages **\$ 17.95 PPD**

Growing Great Garlic

By Ron L. Engeland

The definitive grower's guide written by a small scale farmer who makes his living growing over 200 strains of garlic. Book helps you decide which strains to plant, when to plant, how to plant, when to fertilize, when to prune flower stalks, when to harvest & how to store.

Paperback, 213 pages **\$14.95 PPD**

Chicken Tractor

By Andy Lee

The Gardener's Guide to Happy Hens and Healthy Soil. This revolutionary, practical, hands on book is for gardeners and poultry growers everywhere.

Paperback, 230 pages **\$19.95 PPD**

Putting Food By

By Ruth Greene, Ruth Hertzberg, Beatrice Vaughan

The classic work on the best ways to can, freeze, pickle, dry, cure, and preserve. Includes the newest canning procedures & processing times and many new recipes

Soft cover, 4th edition, 420 pages **\$14.95 PPD**

Square Foot Gardening

by Mel Bartholomew

This book shows you how to get more from less. You will be shown many different garden designs from in ground to raised beds. They tell you when is the best time to plant, how to care for what’s growing and some pretty good recipes for when you harvest. Great book for the person who wants to grow a lot but doesn’t have a large area to garden.

Paperback, 352 pages **\$18.95 PPD**

Panty Hose, Hot Peppers, Tea Bags and More for the Garden

VIOLA														
Tender Perennial, Small 4-6” plants with pansy flowers, good for borders or rock gardens. Germinates in 15 days. Sample packets have 3-5 seeds / Large packets have 10-25 seeds														
<table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">312: Blue</td> <td style="width: 33%;">313: Yellow</td> <td style="width: 33%;">314: White</td> </tr> </table>					312: Blue	313: Yellow	314: White							
312: Blue	313: Yellow	314: White												
MYOSOTIS														
Forget-Me-Not, Beautiful spring flower, usually grown as a biennial, Dwarf 6” plants. Likes moist spots. Germinates in 2 weeks. Sample packets have 3-5 seeds / Large packets have 10-25 seeds														
<table style="width: 100%; border: none;"> <tr> <td style="width: 20%;">307: Blue</td> <td style="width: 20%;">315: Indigo Blue</td> <td style="width: 20%;">316: Pink</td> <td style="width: 20%;">317: White</td> <td style="width: 20%;">329: Mixed Colors</td> </tr> </table>					307: Blue	315: Indigo Blue	316: Pink	317: White	329: Mixed Colors					
307: Blue	315: Indigo Blue	316: Pink	317: White	329: Mixed Colors										
Flowering Cabbage & Kale														
Sow May-June. Maintains color late into fall. Kales used as garnish also.														
330	Flowering Cabbage	Mixed Colors	Sample: 10-15 seeds	Large: 30-50 seeds										
331	Flowering Kale	Mixed Colors	Sample: 10-15 seeds	Large: 30-50 seeds										
Sunflowers														
We tried sunflowers last year in pots at our garden center and found them to be very popular on decks, porches and in flower beds. They are great as cut flowers in arrangements or in a vase on your table. It is best to start these varieties indoors in pots for earlier blooms.														
334	Autumn Beauty	Annual, 110 days to bloom. Easy to grow, great cut flower. Colors similar to autumn leaves with yellows, bronze & bicolors. Flowers up to 8” across. Ht up to 5’.	A	B										
335	Ice Cream White	Annual, 120 days to bloom, flowers pearly. White to creamy yellow with dark brown centers. Flowers 4-5” across. Ht 48”	A	B										
336	Velvet Queen	Annual, 110 days to bloom, 5” flowers deep bronze, reds & burgundy colors with dark centers. Makes good cut flower	A	B

Plant Guarantee: We guarantee our plants to arrive alive and healthy. When you receive your plants open the box immediately and check order to make sure it is correct, if plants are dry place plant in a shallow pan of water in a shaded place and allow them to take up the water. If the plant doesn't perk up in 24 hours call us so we can replace that plant for you. Please have your invoice # ready when you call. (It's in the upper right-hand corner of your invoice).

SAMPLE SEED PACKET ORDER .35 EACH

Circle the ones you want

Grid of 10 columns and 50 rows of numbers for sample seed packet order.

Total # Pkts ____ X .35 = \$ _____

Put Total in space marked Sample Seeds on the bottom of the center column of this side of form

Take this order form out and mail in
